Narrative Structure

Narrative Structure

TED's "Ten Commandments"

- 1. Dream big.** Strive to create the best talk you have ever given. Reveal something never seen before. Do something the audience will remember forever. Share an idea that could change the world.

TED's "Ten Commandments"

2. Show us the real you.

Share your passions, your dreams... and also your fears. Be vulnerable. Speak of failure as well as success.

TED's "Ten Commandments"

3. Make the complex plain.

Don't try to dazzle intellectually.

Don't speak in abstractions.

Explain! Give examples. Tell stories. Be specific.

TED's "Ten Commandments"

4. Connect with people's emotions. Make us laugh! Make us cry!

TED's "Ten Commandments"

5. Don't flaunt your ego.

Don't boast. It's the surest way to switch everyone off.

TED's "Ten Commandments"

6. No selling from the stage!

Unless we have specifically asked you to, do not talk about your company or organization. And don't even think about pitching your products or services or asking for funding from stage.

TED's "Ten Commandments"

7. Feel free to comment on other speakers' talks, to praise or to criticize.

Controversy energizes!

Enthusiastic endorsement is powerful!

TED's "Ten Commandments"

8. Don't read your talk. Notes are fine. But if the choice is between reading or rambling, then read!

TED's "Ten Commandments"

9. End your talk on time.

Doing otherwise is to steal time from the people that follow you.
We won't allow it.

TED's "Ten Commandments"

10. Rehearse your talk in front of a trusted friend ... for timing, for clarity, for impact.

This is especially challenging when multiple people are giving the talk together!

Other Presentation Tips...

- Practice, practice, practice.
- Watch lots of talks for good role models.
- Breathe.
- Vary tone & rate of speaking.
- Take pauses. Avoid filler words (um, ah, uh).
- Never apologize.
- Always have a clear message.
- Make sure to have your “ah ha!” moment.
- Know your audience.

STORYTELLING

GOALS FOR TODAY

- Learn about the basic narrative elements of a story arc.
- Learn about the three basic storytelling scenarios, and how that informs your visualization.
- Learn the 7 genres of visual storytelling, and what the advantages of each one are.

Hall of Fame or Hall of
Shame

Carte Figurative des pertes successives en hommes de l'Armée Française dans la campagne de Russie 1812-1813.

Dressée par M. Minard, Inspecteur Général des Ponts et Chaussées en retraite. Paris, le 20 Novembre 1869.

Les nombres d'hommes présents sont représentés par les largeurs des zones colorées à raison d'un millimètre pour dix mille hommes; ils sont de plus écrits en travers des zones. Le rouge désigne les hommes qui entrent en Russie, le noir ceux qui en sortent. — Les renseignements qui ont servi à dresser la carte ont été puisés dans les ouvrages de M. M. Chiers, de Ségur, de Fezensac, de Chambray et le journal inédit de Jacob, pharmacien de l'Armée depuis le 28 Octobre.

Pour mieux faire juger à l'œil la diminution de l'armée, j'ai supposé que les corps du Prince Jérôme et du Maréchal Davout qui avaient été détachés sur Minsk et Mohilow et ont rejoint vers Orscha et Witebsk, avaient toujours marché avec l'armée.

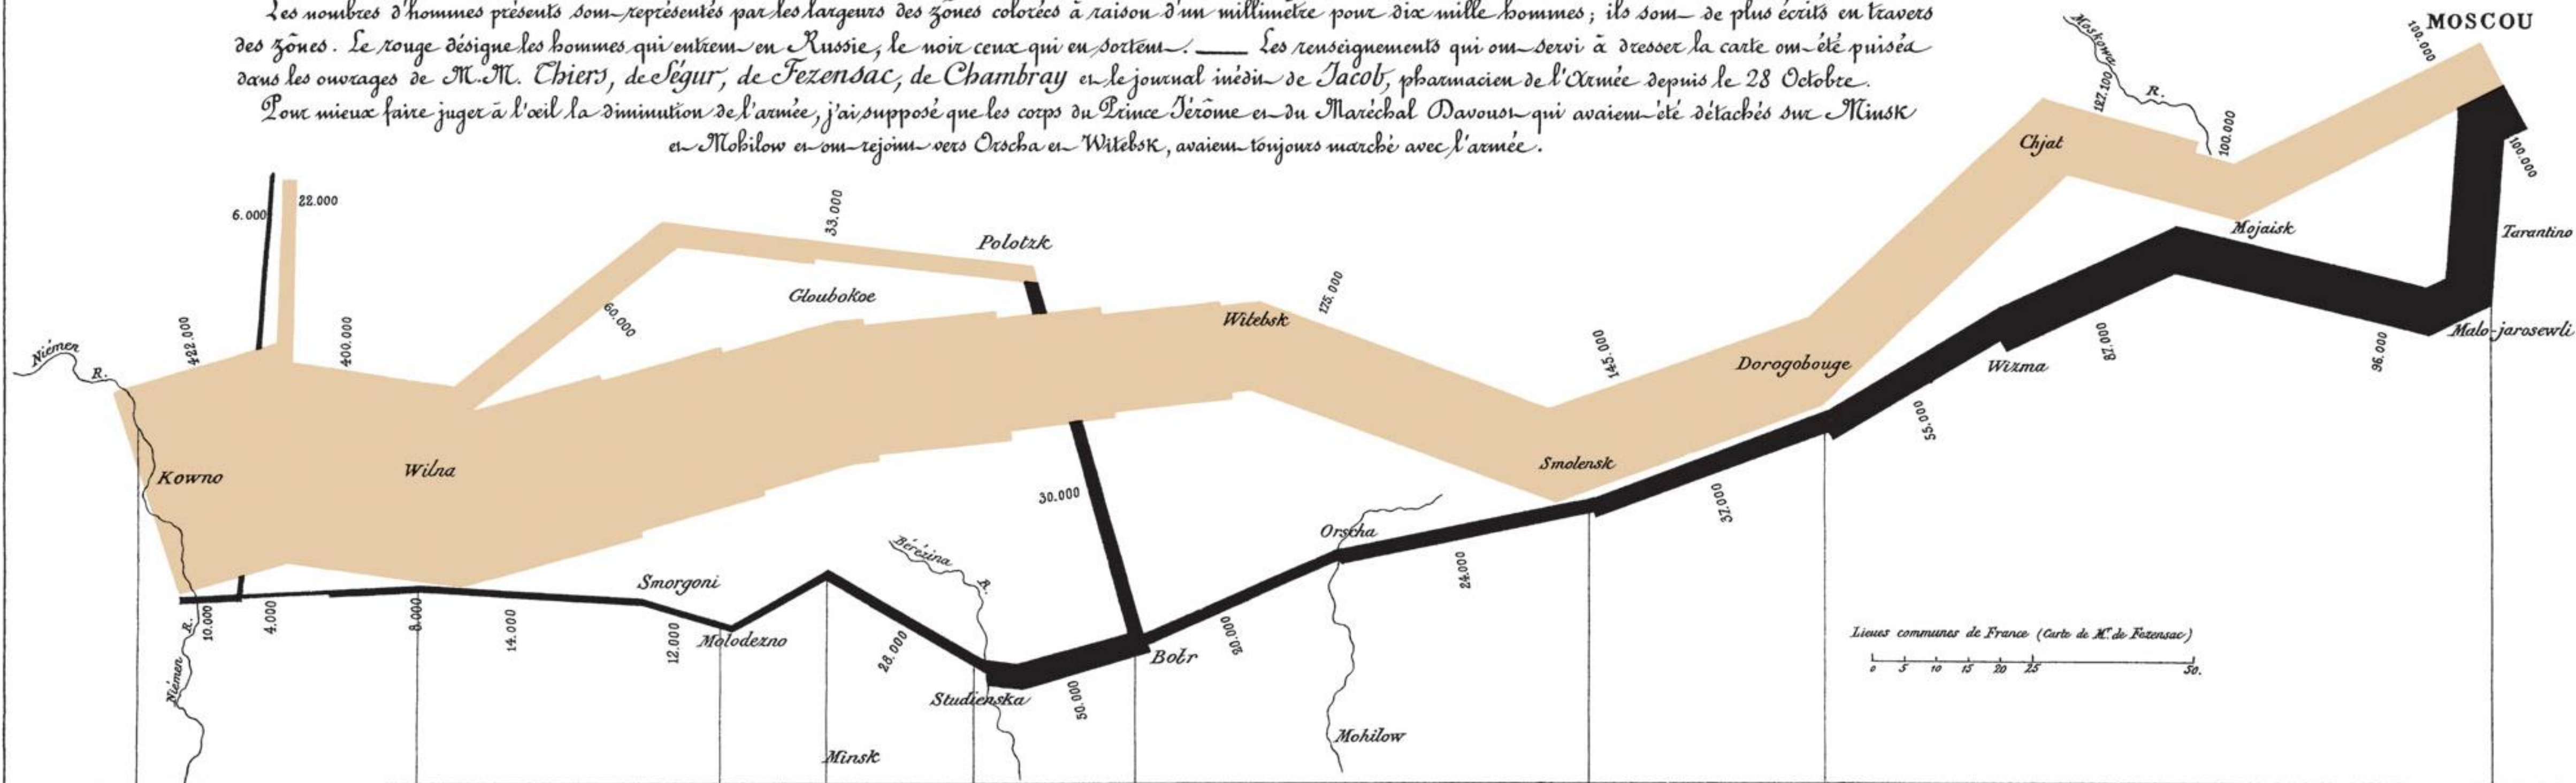

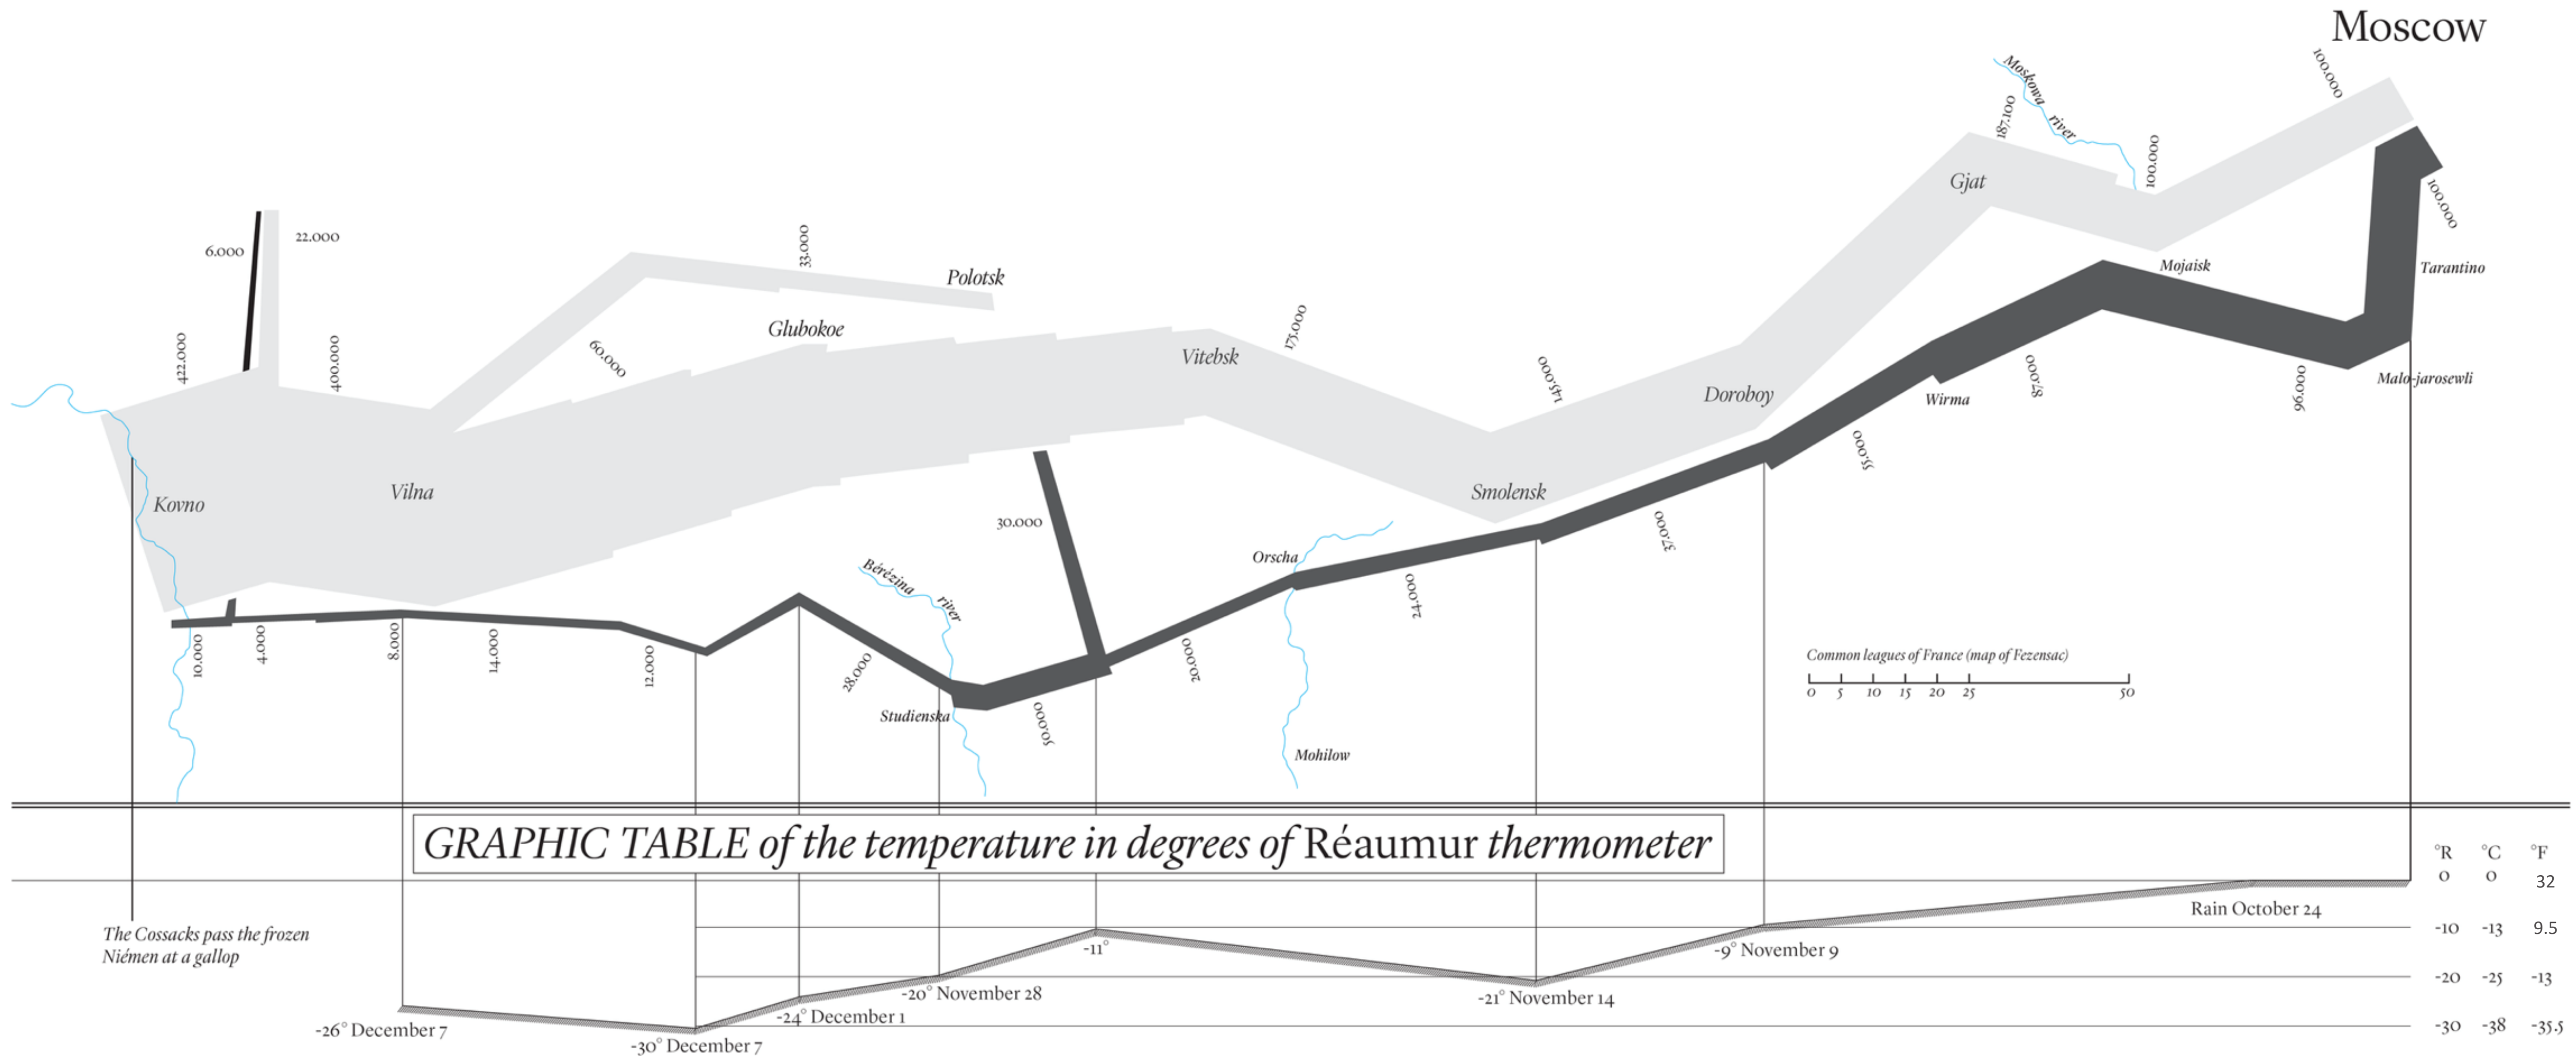

TABLEAU GRAPHIQUE de la température en degrés du thermomètre de Réaumur au dessous de zéro.

Les Cosaques passent au galop le Niemen gelé.

FIGURATIVE MAP of the successive losses in men of the French Army in the RUSSIAN CAMPAIGN OF 1812-1813

Drawn by Mr. Minard, Inspector General of Bridges and Roads in retirement. Paris, 20 November 1869. The numbers of men present are represented by the widths of the colored zones in a rate of one millimeter for ten thousand men; these are also written beside the zones. Red designates men moving into Russia, black those on retreat. — The informations used for drawing the map were taken from the works of Messrs. Chiers, de Ségur, de Fezensac, de Chambray and the unpublished diary of Jacob, pharmacist of the Army since 28 October. In order to facilitate the judgement of the eye regarding the diminution of the army, I supposed that the troops under Prince Jérôme and under Marshal Davoust, who were sent to Minsk and Mobilow and who rejoined near Orscha and Witebsk, had always marched with the army.

Figurative map of Imperial Navy troop losses in the Galactic Civil War, 0 BBY-5ABY

People hear statistics, but they feel stories

Once your business has started collecting and combining all kinds of data, the next elusive step is to extract value from it. Your data may hold tremendous amounts of *potential value*, but not an ounce of value can be created unless insights are uncovered and translated into actions or business outcomes. During a [2009 interview](#), Google’s Chief Economist Dr. Hal R. Varian stated, “The ability to take data—to be able to understand it, to process it, to extract value from it, to visualize it, to communicate it—that’s going to be a hugely important skill in the next decades.” Fast forward to 2016 and many businesses would agree with Varian’s astute assessment.

As data becomes increasingly ubiquitous, companies are

Narrative Visualization: Telling Stories with Data

Edward Segel and Jeffrey Heer

What is a story?

- Story - an ordered sequence of steps with a clearly defined path through it.
- Common components:
 - Characters
 - Setting
 - Plot
 - Conflict
 - Resolution

What is a story in visualization?

- Story - an ordered sequence of steps with a clearly defined path through it.
- Steps can contain text, images, visualizations, or video, or combinations.
- Order is a key element of stories (usually linear in time).

Storytelling Scenarios

- Self-running presentation to a large audience: Self-explanatory; limited interaction; similar to a written story.
- Live presentation by a speaker in front of audience: Speaker can respond to audience, answer questions, pause story and interact. Additional layers/annotations, interactivity.
- Individual/small-group presentation of results: More interaction with audience; presentation leads to new questions; collect and consolidate information.

Bear market: prolonged price declines

October 11, 2008

How This Bear Market Compares

SIGN IN TO E-MAIL OR SAVE THIS | [FEEDBACK](#)

The current bear market is already among the worst in history. Here is how it lines up – in losses and length – with those of the last 80 years.

The S.& P. 500, adjusted for inflation, shown monthly during bear markets.

Stocks dropped 24 percent on Black Monday and Tuesday in 1929. And as bank failures began to mount and the economy sunk into a depression, they turned down again, sharply. At their low point, they were more than 80 percent below their 1929 high. After hitting bottom in 1932, it took 29 years - until 1958 - for the market to reach its pre-Depression, inflation-adjusted peak.
